OBJECTIVE

Motivated Computer Engineering student with hands-on experience in software development, AI/ML, and cloud-based application deployment. Proven track record across multiple internships in data science, Python development, and full-stack web development, complemented by a global finalist placement in an international innovation challenge. Passionate about building practical, technology-driven solutions and continuously expanding technical expertise.

EXPERIENCE

Celebal Technologies — Data Science Intern *Jun 2026 - Present*

- Participating in a structured, industry-oriented internship bridging academic learning with real-world technology practices across enterprise-level workflows.
- Gaining hands-on exposure to scalable, efficient software development practices spanning software engineering, cloud technologies, and data-driven/AI applications.

Inizent Internet Solutions Pvt Ltd — Python Developer Intern *Jan 2026 - Mar 2026*

- Contributed to a project focused on energy consumption reduction, assisting with data handling, script development, and logic implementation using Python.
- Analyzed energy usage data and tested optimization approaches, gaining hands-on exposure to real-world project workflows.

Domain Education Kolhapur — AI & ML Training *May 2023 - Jul 2023*

- Learned core AI/ML concepts with hands-on exposure to Python libraries including OpenCV, pytsx3, and NumPy.
- Applied theoretical concepts in practical projects, including developing a voice assistant for personal use.

Dnyan Group Digital Innovation — Full-Stack Developer Intern *Mar 2023 - May 2023*

- Designed and implemented responsive user interfaces while developing backend logic, APIs, and database interactions in a startup environment.
- Participated in debugging, feature enhancements, and end-to-end testing of a web-based application.

PROJECTS

Safe Road (High Tech Road Lines) – AI-Based Road Safety System *Jan 2025 - Feb 2026*

Key Skills: Python, AI/ML, IoT, Android Development

Project Link: <https://www.youtube.com/watch?v=I4HXnP-gsNE>

- Built an AI-integrated emergency response system using real-time roadside camera feeds to detect accidents and crash patterns, triggering instant alerts without waiting for manual reporting.
- Developed intelligent ambulance traffic management that coordinates with city traffic signals to create a green-wave path, reducing ambulance travel time to hospitals.
- Implemented an in-app SOS feature sharing live GPS location and dual-camera video streaming to give responders real-time situational awareness.

Plumeria Retreat – Booking Website *Apr 2025 - Jun 2025*

Key Skills: HTML, CSS, JavaScript, Vercel

Project Link: <https://plumeriaretreat.vercel.app/>

- Built and deployed a responsive accommodation booking website with a clean, user-focused interface and smooth navigation.

SKILLS

Programming Languages: Python, Java, C++, C

Web & App Development: HTML, CSS, JavaScript, Android Studio

AI/ML & Data: OpenCV, pytsx3, NumPy, Pandas, Scikit-learn

Database: MySQL, Firebase

Tools & Concepts: Git, GitHub, SDLC, OOP, Data Structures & Algorithms

ACHIEVEMENTS & CERTIFICATIONS

- Global Finalist & People's Choice Award winner – Technology Infusion Grand Challenge (Top 5 in Asia), La Trobe University.
- Currently at Explorer Rank on Salesforce Trailhead.
